PONCHO® PLUS INSECTICIDAL SEED TREATMENT

ACTIVE CONSTITUENT: 360 g/L CLOTHIANIDIN
240 g/L IMIDACLOPRID

GROUP 4A INSECTICIDE

For the control of various insect pests in a range of crops, as specified in the DIRECTIONS FOR USE table

CONTENTS: 5 L, 10 L, 20 L, 100 L, 110 L, 200 L, 1000 L

BASF Australia Ltd ABN 62 008 437 867
Level 12, 28 Freshwater Place Southbank  VICTORIA

APVMA Approval No.: 67779/120311
STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight.
Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point.
If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS
Harmful if swallowed. Harmful if inhaled. Avoid contact with skin. Do not inhale. When preparing the product for use and using the product, wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and a washable hat and elbow-length chemical resistant gloves. If product on skin, immediately wash area with soap and water. Wash hands after use. After each day’s use wash gloves and contaminated clothing.

FIRST AID
If poisoning occurs contact a doctor or Poisons Information Centre (telephone 13 11 26).

SAFETY DATA SHEET
Additional information is listed in the Safety Data Sheet.

CONDITIONS OF SALE
All conditions and warranties rights and remedies implied by law or arising in contract or tort whether due to the negligence of BASF Australia Ltd or otherwise are hereby expressly excluded so far as the same may legally be done provided however that any rights of the Buyer pursuant to non-excludable conditions or warranties of the Consumer and Competition Act 2010 or any relevant legislation of any State are expressly preserved but the liability of BASF Australia Ltd or any intermediate Seller pursuant thereto shall be limited if so permitted by the said legislation to the replacement of the goods sold or the supply of equivalent goods and all liability for indirect or consequential loss or damage of whatsoever nature is expressly excluded. This product must be used or applied strictly in accordance with the instructions appearing hereon. This product is solely sold for use in Australia and must not be exported without the prior written consent of BASF Australia Ltd.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.
WITHHOLDING PERIODS

Harvest: NOT REQUIRED WHEN USED AS DIRECTED

Grazing:

Maize, sorghum, sweetcorn: DO NOT GRAZE OR CUT FOR STOCKFOOD FOR 4 WEEKS AFTER SOWING

Grass pasture: DO NOT GRAZE OR CUT FOR STOCKFOOD FOR 6 WEEKS AFTER SOWING

Canola, forage brassica, broadleaf pasture: DO NOT GRAZE OR CUT FOR STOCKFOOD FOR 8 WEEKS AFTER SOWING

GENERAL INSTRUCTIONS

INSECTICIDE RESISTANCE WARNING

GROUP 4A FUNGICIDE

For insecticide resistance management, Poncho Plus is a Group 4A insecticide. Some naturally occurring insect biotypes resistant to Poncho Plus and other Group 4A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Poncho Plus and other Group 4A insecticides are used repeatedly. The effectiveness of Poncho Plus on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, BASF Australia Ltd accepts no liability for any losses that may result from the failure of Poncho Plus to control resistant insects. Poncho Plus may be subject to specific resistance management strategies. For further information contact your local supplier, BASF Australia Ltd representative or local agricultural department agronomist.

Pasture seed, canola, forage brassicas, summer crops

Mixing and seed treatment

Prior to pouring, shake container vigorously, then add the required quantity of Poncho Plus to sufficient water to give even coverage of the seed to be treated. Place seed in mixing equipment and rotate. Mix Poncho Plus with sufficient water to give even coverage of seed and spray onto seed. The quantity of water used for mixing will vary depending on type of equipment and type of seed, refer to BASF for specific treatment information. Store treated seed under cover in cool, dry conditions. Do not treat seed with poor viability. Do not store treated seed near foodstuffs or where likely to prove hazardous to humans or animals. Do not carry over maize, sorghum, sunflower or sweet corn seed from one season to the next season. The insecticidal activity of Poncho Plus on the seed is maintained for a minimum of 12 – 18 months.

Flow rate: Poncho Plus treated seed may slow flow rate of seed. Check flow rate of seed through sowing machinery before sowing to ensure the desired seeding rate is achieved.

Seed quality

Poncho Plus seed treatment should only be used on high quality seed which meets or exceeds accepted seed quality parameters. Treating with Poncho Plus as directed may raise the moisture level of the seed by up to 1.5%, depending on conditions at treatment. The use of Poncho Plus mixed with water at recommended rates will have no effect on the storage life of treated sound seed.

Compatibility

Poncho Plus is compatible with Thiram, and P-Pickle T® Liquid Fungicidal Seed Dressing for use. Do not use more than 600 mL of total mixture /100 kg seed (i.e. Poncho Plus + Thiram or P-Pickle T plus water). After treating seed with a mixture of Poncho Plus and P-Pickle T allow seed to dry.

For information on the compatibility of Poncho Plus with other products, contact your local BASF representative.

Storage of treated seed

Do not store treated seed near foodstuffs or where likely to prove hazardous to humans or animals. If the seed is not used immediately after treatment it should be stored in a dry, well ventilated place. Although Poncho Plus has no effect on the viability of treated seed, subsequent germination can be adversely affected by poor storage conditions such as high moisture combined with high temperatures. No liability can therefore be accepted for the performance of stored treated seed.
PRECAUTIONS
When treated seed is stored it should be kept apart from other grain and the bags or other containers should be clearly marked to indicate the contents have been treated with this product. Do NOT allow seed treated with this product to contaminate seed intended for human consumption. Do NOT use treated seed for human consumption. Bags which have held treated seed are not to be used for any other purpose.

Re-handling
Do not allow re-handling of treated seed unless wearing cotton overalls, over normal clothing, buttoned to the neck and wrist and chemical resistant gloves. Clothing must be laundered after each day’s use.

PROTECTION OF LIVESTOCK
Seed treated with this product must not be used for animal consumption or poultry feed or mixed with animal feed. Do NOT allow seed treated with this product to contaminate seed intended for animal consumption.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
Very toxic to aquatic life. DO NOT contaminate ponds, waterways and drains with this product, used containers or bags which have held treated seed. DO NOT feed treated seed or otherwise expose to wild or domestic birds. Any spillages of treated seed, however minor, must be cleaned up immediately, preferably by recovery and re-use. If disposal is required, ensure treated seed are thoroughly buried and not accessible to birds and other wildlife.

PROTECTION OF BEES AND OTHER INSECT POLLINATORS
This product is highly toxic to bees. Pollinators can be exposed to treated seed dust when it is carried by air or when it is deposited onto flowering crops, flowering weeds or water. Very dry and windy conditions can favour dust transport. For planters that discharge dust into the air, including those using pneumatic vacuum seed metering devices, deflector equipment should be installed to reduce emission of dust and the potential for off-field deposit of dust onto flowering crops or flowering weeds. For planters that discharge dust into the air, DO NOT perform seeding operations under very dry or windy conditions.

STORAGE AND DISPOSAL
Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SAFETY DIRECTIONS
Harmful if swallowed. Harmful if inhaled. Avoid contact with skin. Do not inhale. When preparing the product for use and using the product, wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and a washable hat and elbow-length chemical resistant gloves. If product on skin, immediately wash area with soap and water. Wash hands after use. After each day’s use wash gloves and contaminated clothing.

FIRST AID
If poisoning occurs contact a doctor or Poisons Information Centre (telephone 13 11 26).

SAFETY DATA SHEET
Additional information is listed in the Safety Data Sheet.
CONDITIONS OF SALE
All conditions and warranties rights and remedies implied by law or arising in contract or tort whether due to the negligence of BASF Australia Ltd or otherwise are hereby expressly excluded so far as the same may legally be done provided however that any rights of the Buyer pursuant to non-excludable conditions or warranties of the Consumer and Competition Act 2010 or any relevant legislation of any State are expressly preserved but the liability of BASF Australia Ltd or any intermediate Seller pursuant thereto shall be limited if so permitted by the said legislation to the replacement of the goods sold or the supply of equivalent goods and all liability for indirect or consequential loss or damage of whatsoever nature is expressly excluded. This product must be used or applied strictly in accordance with the instructions appearing hereon. This product is solely sold for use in Australia and must not be exported without the prior written consent of BASF Australia Ltd.
