

INTRODUCING

LIBERTY LINK®

CHOOSE FREEDOM

with extra in-crop flexibility

LibertyLink® is an effective system that will give canola growers the opportunity to both improve in-crop weed control and reduce selection pressure on glyphosate and clethodim on their farms.

As well as combining high yield potential with PodGuard® harvest flexibility, each of our LibertyLink varieties will include triazine or TruFlex® tolerance so Liberty® Herbicide can be used – only when needed – as part of a more responsive and adaptable multi-herbicide program.

Two varieties, too good!

- ✓ Competitive yields to leading TT hybrids
- ✓ Improved control of resistant annual ryegrass
- ✓ Only TT variety with unique PodGuard trait technology

NEW

- ✓ Exceptional yields
- ✓ Outstanding management flexibility for weed control and harvest
- ✓ The only triple trait TruFlex variety

Liberty herbicide

- ✓ A new herbicide MoA in winter cropping systems: Group 10
- ✓ Adds extra flexibility into existing systems
- ✓ Reduces resistance pressure on the other MoAs
