# Nodulator<sup>®</sup>

Granular Legume Inoculant

### **1x10<sup>7</sup>cfu/g at DOM**

- Technologically advanced carrier
- Easy flow formulation
- Performance and convenience

**IMPORTANT: READ THE SAFETY DIRECTIONS BEFORE USING THIS PRODUCT**

CONTENTS: 25kg – 500kg

Nodulator is convenient and economical with carried sowing rates for wider row spacing.

Nodulator flows smoothly through sowing equipment. It puts the inoculant in the furrow, safe from high soil surface temperatures, dry conditions and chemical treatment.

This granular inoculant contains living organisms and requires a relatively high moisture content compared to granular herbicides and insecticides. To optimize flow (especially under humid conditions) it is suggested to only fill large compartments to no more than 50 percent capacity.

Group		Crop
C		Crimson, Cupped, Helmet, Rose and Subterranean clover, Arrowleaf, Balansa, Purple and Persian (Shaftal) clover seed.
E (WSM-4643 (Acid Soil Tolerance Strain))		Lentil, Split Pea, Field Pea, Vetch
F (SRDI-969 (Acid Tolerant Strain))		Faba and Broad Bean
E/F (WSM-1455 Strain (Older combined group strain))	E	Pea, Field Pea, Vetch
	F	Faba and Broad Bean, Lentil
G		Lupin seed, Serradella Pods, Yellow Pink (cv. Cadiz), Hybrid and Slender Serradella Seed
N		Chickpea

#### DIRECTIONS FOR USE

Use loading auger to fill tank and screens provided by equipment manufacturer

#### APPLICATION RATES

To calibrate equipment, refer to the table below for the application rate based on row spacing.

Row Spacing		Application
Inches	cm	kg/ha
7	17.8	6
8	20.3	5.3
9	23	4.6
10	25.4	4.2
11	27.9	3.8
12	30.5	3.5
13	33	3.2
14	36.6	3
15	38.1	2.8
16	40.6	2.6

#### STORAGE/PRECAUTIONS

- Store granular inoculant in a cool, dry place and away from herbicides, pesticides and bulk fertilisers.
- Store bags flat, keeping off of floor (ie pallet) to avoid direct contact with cold, damp surfaces.

**STORAGE/PRECAUTIONS CONTINUED**

- Use before expiration date.
- This product is recommended for use with airseeders.
- Apply granular inoculant directly to the furrow. The product must not be applied at a depth that is less than the planting depth of the seed.
- Do not mix granular inoculant with granular herbicides and fertilisers during planting.
- Remove any unused granules from the hopper box at the end of each days planting. Do not allow granules to sit in hopper overnight.
- Environmental conditions may effect flowability of the product. Regularly check metering system to ensure proper flow.

**PRECAUTIONS**

Avoid prolonged inhalation of dust. Use of a dust mask when handling is recommended.

**This product does not require classification according to GHS criteria**

**SAFETY DATA SHEET**

For further information refer to the Safety Data Sheet (SDS).

**CONDITIONS OF SALE**

All conditions and warranties rights and remedies implied by law or arising in contract or tort whether due to the negligence of BASF Australia Ltd ABN 62008437867 or otherwise are hereby expressly excluded so far as the same may legally be done provided however that any rights of the Buyer pursuant to non excludable conditions or warranties of the Competition and Consumer Act 2010 or any relevant legislation of any State are expressly preserved but the liability of BASF Australia Ltd or any intermediate Seller pursuant thereto shall be limited if so permitted by the said legislation to the replacement of the goods sold or the supply of equivalent goods and all liability for indirect or consequential loss or damage of whatsoever nature is expressly excluded. This product must be used or applied strictly in accordance with the instructions appearing hereon. This product is solely sold for use in Australia and must not be exported without the prior written consent of BASF Australia Ltd.
