Herbicide

## HEAR WHAT GROWERS HAVE TO SAY

We've had some great feedback from growers using Voraxor.

Scan QR codes to watch the videos.

*"We will definitely be using Voraxor again next year!"*

**- Correy Brown, Coorow WA**

*"It does save you a lot of time straight after seeding, getting those little radish, trying to get them before it costs you too much."*

**- Gerald Rowe, Mullewa WA**

*"It was very suprising to my team that the effect of Voraxor was nearly immediate!"*

**- Graham Barron, Ungarie NSW**

# COMPLETE YOUR PRE-PLANT WEED CONTROL PROGRAM

Use Voraxor® Herbicide to complete the weed coverage of your pre-sowing spray program, set up higher yields and reduce the total number of herbicides you apply each season.

## Simpler, more comprehensive broadleaf weed control

- Up to 12 weeks' residual pre-emergent control of key broadleaf weeds in wheat, durum, barley, oats, triticale and now also chickpeas, faba beans and field peas
- Rapid and reliable control of 29 broadleaf weeds standalone and more in tank-mixes with glyphosate or paraquat

## Strengthening the double-knock

- Adding 1% MSO to the pre-em application provides fast, reliable knockdown control as well
- Trials show that glyphosate followed by Voraxor can be a more effective double-knock than glyphosate followed by paraquat

## Bonus impact on annual ryegrass

- Residual pre-emergent suppression of annual ryegrass in light textured soils
- Enhanced knockdown control of seedling ARG, including glyphosate-resistant biotypes, in tank-mixes with glyphosate or paraquat

In most cases Voraxor will be used in tank-mixes with products that are registered for control of annual ryegrass. Trial work shows that mixing Voraxor with grass weed pre-emergent herbicides like Luximax® and Sakura\* will enhance their annual ryegrass control by about the same amount as trifluralin.

### Residual control after 8 weeks

*Control of wild radish and suppression of annual ryegrass at the BASF Innovation Site, York WA 2018.*

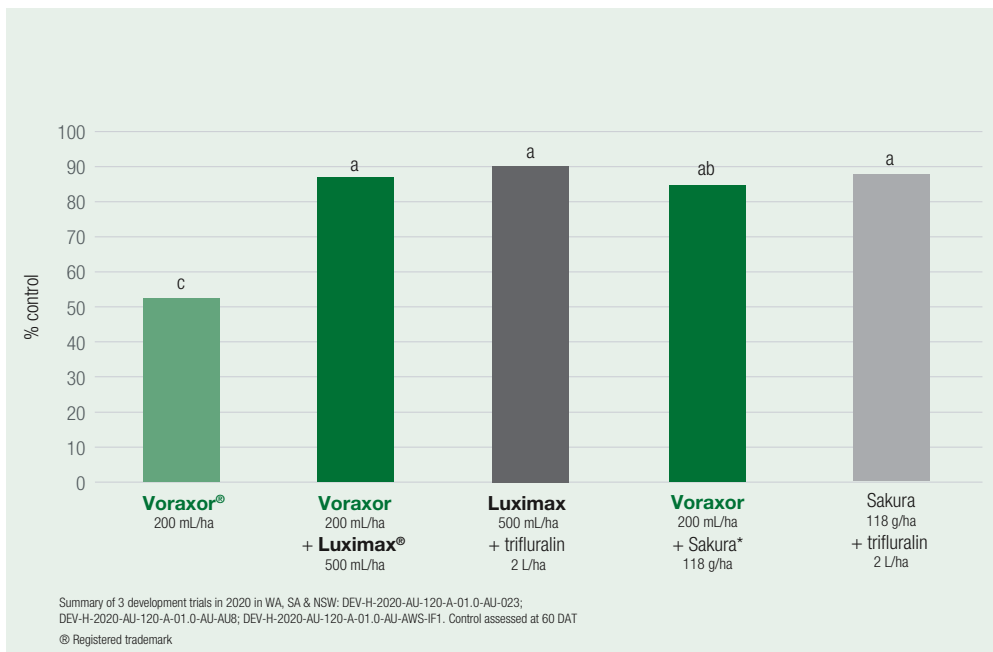

# Excellent residual control of key BLWs

Voraxor has proven its effectiveness on a wide range of broadleaf weeds with industry-leading residual control, saving time and money.

## AVERAGE RESIDUAL CONTROL ACROSS ALL DEVELOPMENT TRIALS

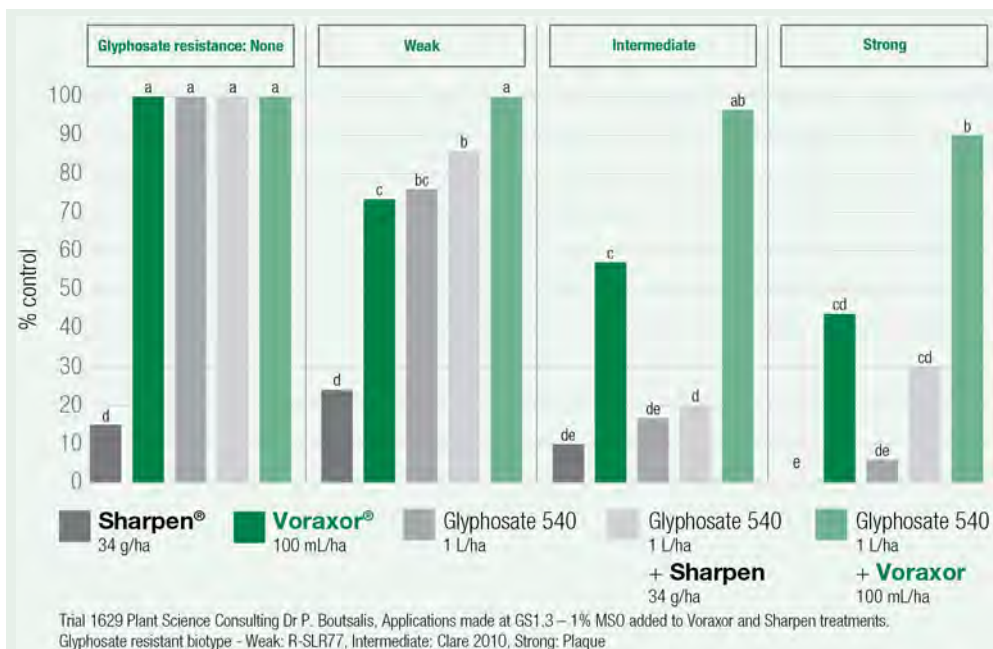

Bedstraw	<b>91%</b>	Deadnettle	<b>87%</b>	Indian hedge mustard	<b>88%</b>	Spear thistle	<b>98%</b>
Black bindweed	<b>97%</b>	Field bindweed	<b>88%</b>	Prickly lettuce	<b>100%</b>	Wild radish	<b>87%</b>
Capeweed	<b>88%</b>	Fleabane	<b>94%</b>	Shepherd's purse	<b>92%</b>	Wild turnip/ turnip weed	<b>97%</b>
Crassula	<b>94%</b>	Fumitory	<b>83%</b>	Sowthistle/ milk thistle	<b>92%</b>	Wireweed	<b>94%</b>

Average % control compared to untreated achieved by 200 mL/ha Voraxor applied 0–7 days before IBS in development trials 2013–17. Control assessed at 56–115 days after treatment.

## Additive impact on annual ryegrass

While Voraxor will provide standalone residual suppression of annual ryegrass in light textured soils, this graph shows that tank-mixing it with a premium pre-emergent herbicide has an additive effect that makes it a viable alternative to trifluralin as a 'ryegrass spike'.

## Control of glyphosate-resistant annual ryegrass

These results from a pot trial by Dr Peter Boutsalis show just how much difference adding Voraxor to glyphosate can have on controlling resistant biotypes of annual ryegrass.

# Application options

There are three application rates on the Voraxor label. Applying Voraxor at the higher rates for residual control will also help knock down emerged weeds before sowing.

<b>1:</b> e.g. Tank-mixed with premium ARG product	<b>2:</b> e.g. As part of a double-knock program	<b>3:</b> e.g. Fallow, summer weed spraying etc.
<p style="text-align: center;"><b>200 mL/ha + 1% high-quality MSO 0–7 days before IBS</b></p> <ol style="list-style-type: none"> <li>Residual control of 16 broadleaf weeds</li> <li>Residual suppression of ARG in lighter soils (grass assist)</li> <li>Assists in the knockdown control of annual ryegrass including glyphosate-resistant ARG biotypes</li> <li>Knockdown of 29 broadleaf weeds</li> </ol>	<p style="text-align: center;"><b>240 mL/ha + 1% high-quality MSO 7–21 days before IBS</b></p> <ol style="list-style-type: none"> <li>Residual control of 16 broadleaf weeds</li> <li>Residual suppression of ARG in lighter soils (grass assist)</li> <li>Assists in the knockdown control of annual ryegrass including glyphosate-resistant ARG biotypes</li> <li>Knockdown of 29 broadleaf weeds</li> </ol>	<p style="text-align: center;"><b>100 mL/ha + 1% high-quality MSO Fallow + pre-plant knockdown</b></p> <ol style="list-style-type: none"> <li>Knockdown of 29 broadleaf weeds</li> <li>Knockdown of up to 41 weeds when tank-mixed with glyphosate or paraquat</li> <li>Assists glyphosate or paraquat in the control ARG including glyphosate-resistant biotypes</li> </ol>

Apply Voraxor in 80–250 L/ha of water using standard boom-spraying equipment with nozzles calibrated to deliver a COARSE spray quality and ensure complete and even spray coverage.

Voraxor applied for residual control must be incorporated by sowing within the specified incorporation window for the rate applied. For knockdown control always add 1% high-quality MSO.

**Applying Voraxor in tank-mixes with other knockdown and pre-emergent herbicides with different modes of action will maximise efficiency, weed coverage and the profitability of your crop protection.**

# Voraxor<sup>®</sup>

Herbicide

# WEED smart

every weed every seed  
every farm every year

## START THE SEASON WITH MORE EFFICIENT & COMPREHENSIVE WEED CONTROL

- ✓ Benchmark pre-emergent control of broadleaf weeds for up to 12 weeks
- ✓ Ideal tank-mix option for Luximax and other grass pre-ems in cereals
- ✓ Rapid and reliable knockdown of both grass and broadleaf weeds
- ✓ Back-up control of glyphosate-resistant annual ryegrass

Find out more about Voraxor and our other great products  
at [crop-solutions.basf.com.au](http://crop-solutions.basf.com.au) or by calling 1800 558 399

Stay one step ahead  
of annual ryegrass,  
with the only Group 30  
herbicide

The year-round  
performer and  
must-have herbicide  
for every grower's shed

Advanced disease  
protection for barley,  
wheat and oats
