

The latest high-performance hybrid raising the bar in yield protection

NEW

InVigor[®] LR 4040P

Top-end early-mid LR hybrid yield with flexible weed control

Our latest TruFlex hybrid with LibertyLink[®] offers an upgrade both in yield potential and post-emergence weed control options now that Liberty[®] ULTRA has boosted the efficiency and effectiveness of glufosinate sprays.

So why choose InVigor LR 4040P?

Extra yield potential

- Trials show InVigor LR 4040P consistently producing higher yields than competitor varieties in low-medium rainfall NVT trials
- InVigor LR 4040P has excellent seedling vigour and high oil

Extra yield protection

- The option of using Liberty ULTRA to introduce a fresh mode of action in its most potent form
- Improved control of annual ryegrass with resistance to glyphosate and clethodim
- PodGuard protection delivers more grain to the bin

Extra harvest flexibility

- PodGuard makes harvest timings much less critical
- Windrow later – up to 90% colour change – or direct head with much less risk of shattering

Variety profile:

Herbicide tolerances:	LibertyLink + TruFlex
Maturity:	Early-mid (4.0)
Blackleg rating with ILeVO [®] :	RMR
Blackleg group:	B
PodGuard [®] :	Yes
Height:	Medium

VIGOUR:

OIL:

0 5 10

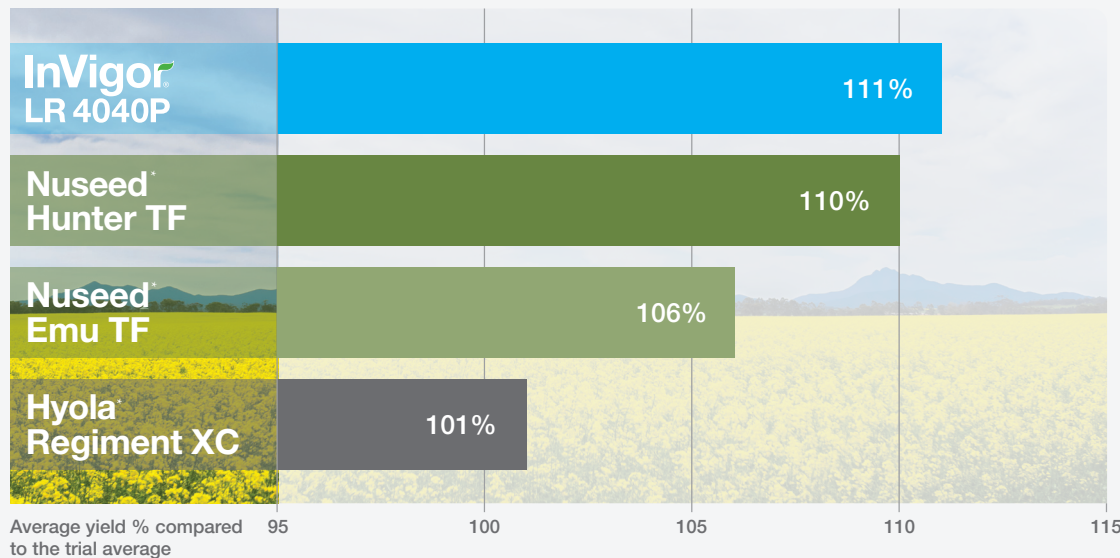

NEW

InVigor[®] LR 4040P

Superior TruFlex hybrid yields

Trial results show that growers can choose InVigor LR 4040P ahead of alternative TruFlex hybrids and gain extra yield even if they don't use the extra protection of PodGuard to delay harvest.

Averaged results from fifteen trial sites

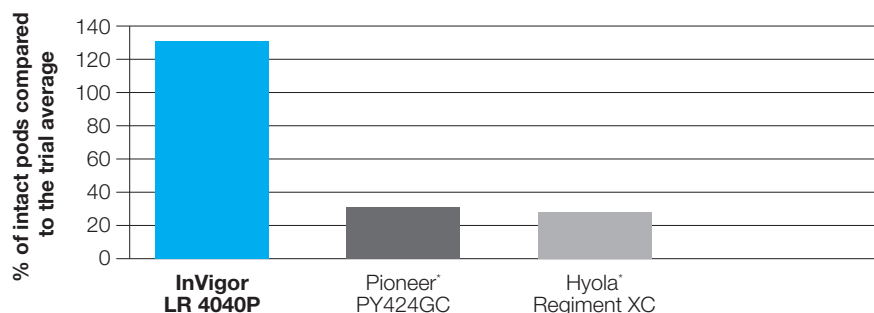

GRDC
NATIONAL
VARIETY
TRIALS[™]

NVT glyphosate tolerant low-medium rainfall long term yield average. WA Agzones 1,2,3,4. Average yields in 2.5 t/ha yield environment. 15 trials.

Added flexibility at harvest

InVigor LR 4040P with the benefit of PodGuard, has higher pod shatter tolerance than non-PodGuard varieties, allowing growers to delay swathing or direct head with extra confidence.

The chart shows the relative shatter tolerance of selected TruFlex varieties. A Random Impact Test was used multiple times. The results reflect the average of intact pods (of 20 starting pods) after 90 seconds vs the trials average.

The best seed comes with the best seed treatments:

Poncho[®] Plus

Insecticidal Seed Treatment

A highly effective broad-spectrum insecticide

ILeVO[®]

Seed Treatment Fungicide

A powerful fungicide for protection against blackleg

Grow with confidence

Replace MySeed[™]

You're covered** for the first 45 days if your crop fails to establish and you have to re-sow.
